

Build Date: 2010-10-25; Version: 2.1

- When used to automatically upgrade a truck, there wasn't a space in the name of the app being upgraded. This visual bug is fixed.
- During an auto upgrade, Fusion Installer would forget to launch the new version of Fusion after the upgrade. Mac only. This is fixed.
- When used to Auto Upgrade Fusion, both Fusion Installer and Fusion would lock up. Windows only. This is fixed.
- Fusion Truck and Fusion Server installations now correctly associate the data file with the application. This means that you no longer need to follow the steps in the Finding the Datafile document after an install or upgrade.
